

# LinkedIn

## Setup Guide

Easy

15 minutes

## Tandem Beam

### Quick Facts

<b>Click ID:</b>	li_fat_id (LinkedIn First-Party Ad Tracking)
<b>Authentication:</b>	Access Token (simple bearer token)
<b>Test Mode:</b>	No sandbox (production only)
<b>Events Supported:</b>	purchase, lead, sign_up, add_to_cart, page_view

### Prerequisites

- LinkedIn Campaign Manager account
- Admin access to LinkedIn Ads account
- LinkedIn Insight Tag installed (for li\_fat\_id capture)

### Setup Steps

#### 1 Access LinkedIn Campaign Manager

Log in to LinkedIn Campaign Manager ([linkedin.com/campaignmanager](https://linkedin.com/campaignmanager)) > Select your Ad Account

#### 2 Generate Access Token

Go to Analyze > Conversion tracking > Data sources > Select Conversions API > Click "Generate token". This creates a non-expiring access token for the Conversions API.

#### 3 Configure in Tandem Beam

- Return to Platform Configurations
- Click Add New Configuration
- Select LinkedIn
- Paste your Access Token
- Click Save Configuration

### Configuration Fields Reference

Field Name	Format	Required
Access Token	LinkedIn API token (50+ characters)	Required

**Security Note:** Keep all API tokens, secrets, and credentials secure. Never share them publicly or commit them to version control. If credentials are compromised, regenerate them immediately in the respective platform's settings.
